

Heating Desk Pad

Heating Desk Pad,
the solution to get
your hands warm

3 heating
zones

3 levels of
intensity

Non-slip
coating

Multipurpose
(hands and feet)

Gentle heat at your fingertips

In winter or in cold weather, we are (for many) facing the same problem: warming your hands when working on the computer. Slipping them under some fabric or under a hot water bottle only warms them up for a moment... And if you prefer gentle, constant heat that stays directly under your frosted hands?

Discover our heated office desk pad: **a solution for cold hands**, fast and effective, providing you with continuous and pleasant warmth.

2 zones & 3 temperatures

Take advantage of **2 independent heating zones**: the upper and lower parts, allowing different uses. You can also heat your entire desk pad. The **heat sensation is fast, constant and evenly distributed** across the entire surface of the desk pad.

Different uses

Are you working with a laptop and afraid of overheating?

The Heating Desk Pad has been conceived and designed for different uses. Select the **H2** mode to heat the lower part of the desk pad, and place your computer on the top half. You will then warm up your forearms, while avoiding heating the laptop.

Select the H3 mode to take advantage of the entire heating pad.

3 choices of temperatures

Thanks to its **3 choices of temperatures** (40-45-50°C), your Heating Desk Pad will allow you to choose the ideal temperature for warming up to your convenience.

Multipurpose

Little extras

Lightweight, **non-slip**, aesthetically pleasing: the Heating Desk Pad is your solution for this winter. You'll never want to be without it! Thanks to its **memory function**, when the device is turned on again it will remember the mode and temperature of its last use

Its **soft cotton surface** and **XXL format** allows multiple uses: office work, gaming, reading, board games, puzzles, taking notes, etc. Warm up safely thanks to **automatic shutdown** after 4 hours.

Heating Desk Pad

LA180503

Features

- **3 heat zones** that can be programmed according to your needs
- **3 temperatures** (40°C, 45°C and 50°C)
