Dobra
AIR HUMIDIFIER

A commitment to your health

We breathe approximately 20,000 times each day, representing a daily requirement of 12,000 litres of air. The quality of the air we inhale in this way has a direct impact on our well-being: air that is too humid can give rise to health problems (allergies, asthma, etc.), while overly dry air dries out the mucous membranes and skin, contributes towards fatigue and sensations of discomfort and, at the same time, increases air pollution. Doctors and specialists agree on **an optimum humidity level of between 40 and 60%**. The ambient air may become too dry, particularly in winter, because of the lack of ventilation and heating, etc. Although we don't always realise it, this impacts on our physical and mental wellbeing and alters the overall quality of the air by promoting its pollution.

The right response for eliminating the discomfort of air that is too dry

The Dobra humidifier helps you restore a proper humidity level and eliminate the discomfort indoors.

Its 2.5-ltr capacity reservoir enables you to humidify your air for more than 12 hours continuously. You choose between a low emission intensity (about 100ml/hr) or strong emission intensity (about 150ml/hr) and let the humidifier do its work. It will shut off automatically when the reservoir is empty. What is more, it has a “night mode” so that you can enjoy the comfort of continuously humidified air in peace when you are sleeping.

Finally, the Dobra will add a touch of stylish light to your interior by choosing between 3 shades of LED white (warm, neutral, cool).

Management largely facilitated with the opening through the top

The Dobra is one of a new generation of ultrasonic humidifiers, the reservoir of which is filled from above by removing a lid and not through a small opening in the base. This opening through the top greatly facilitates the everyday management of the device, when filling and emptying the reservoir, or even when cleaning it.

Two ways of improving air quality with a single gesture

The Dobra is designed to support the use of essential oils. Pour them directly into the water in the reservoir. They will thus be efficiently diffused in the ambient air at the same time as the air is being humidified. With a single gesture you will therefore enjoy an aromatherapy session, benefitting from the attributes of the essential oil of your choice.

Features

- Cool mist humidifier
- Reservoir capacity: 2.5 ltr
- Maximum mist flow rate: 150 ml/hr
- Switches off automatically when the water level is too low

- Easy to clean

- Convenient to fill through the top

- Suitable for use with essential oils

- 2 levels of intensity + 🌙 night mode
- Touch control
- LED indicator
- Red LED indicator showing empty of water

- Continuous operation: ± 12 hrs
- For spaces up to 30m²
- Quiet operation (< 35 DB)

Intended for those looking for a humidifier that is easy to use and efficient, the Dobra has many attractive features that make it a product that fits perfectly in a living room.

Master Box Dimensions
