The warming cocoon designed for your pet

The **Heat Nest** provides your pet with a cozy and comforting place to rest. Its integrated heating pad emits gentle warmth, ideal for chilly cats or dogs sensitive to cold.

With its refined design and soft materials, it offers a real cocooning experience. Perfect for napping at home, it delivers optimal comfort every day.

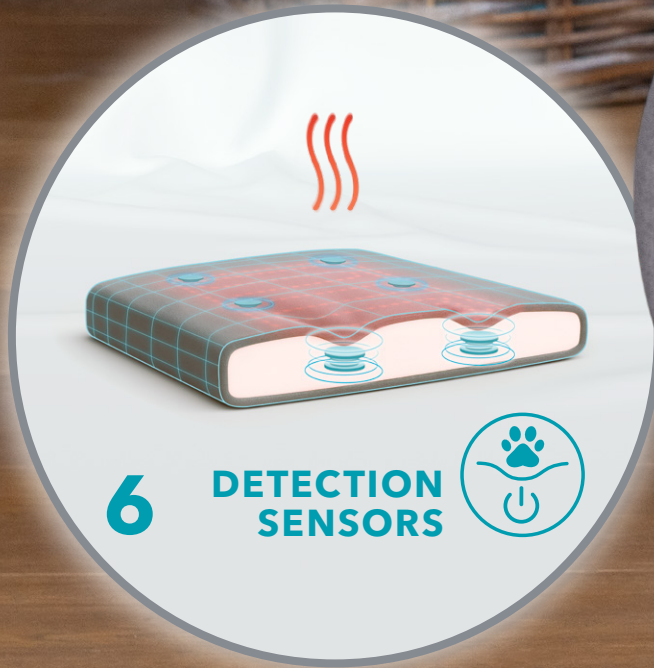

Adjustable, gentle warmth

With three heat settings (40, 45, and 50°C), the **Heat Nest** adapts to the specific needs of each animal. The temperature is easily adjustable via an intuitive remote control.

A light indicator shows the selected level, from mild to warm, as well as the active mode. Easy to use, the basket ensures controlled thermal comfort.

A smart bed that adapts to your pet's presence and your needs

Once switched on, the automatic mode starts immediately and heats the cushion at the lowest temperature. The sensor mode detects your pet's presence and activates heating when it settles in, switching off as soon as it leaves.

This smart operation saves energy and prevents overheating – a practical and safe solution for everyday use.

Safety, convenience and easy maintenance

The **Heat Nest** features automatic shut-off after 45 minutes, a reinforced cable resistant to bites and scratches, and overheat protection.

The covers of both the basket and cushion are removable and machine-washable at 30°C.

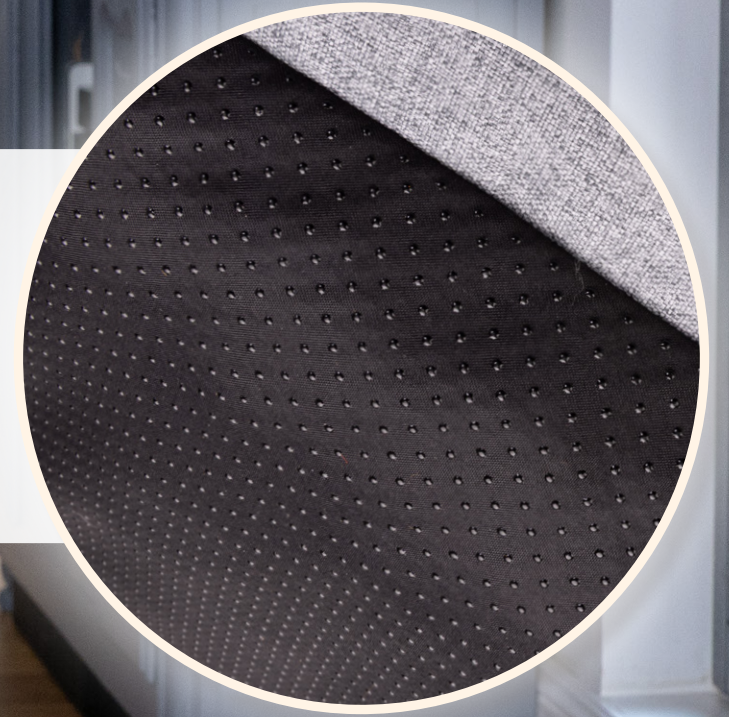

Both the cushion and its cover are waterproof, ensuring hygiene and safety.

Discreet and elegant design for your home

Thanks to its welcoming shape and neutral fabric, the **Heat Nest** blends seamlessly into any interior. It combines functionality with aesthetic appeal.

The non-slip base and lowered entrance provide comfort and accessibility, even for elderly or small pets.
