10/15 min.

Heating function

The Bodyscan Massager, an **effective deep massage**

Sit comfortably on your **Bodyscan Massager** massage seat cover and let yourself go to the rhythm of shiatsu and rolling massages. Installed on a sofa, chair or office chair, this massage seat offers you a tailor-made massage thanks to its body scan function. Imitating traditional shiatsu and rolling massages perfectly, the Bodyscan massager will let you enjoy a moment of absolute unwinding and relaxation.

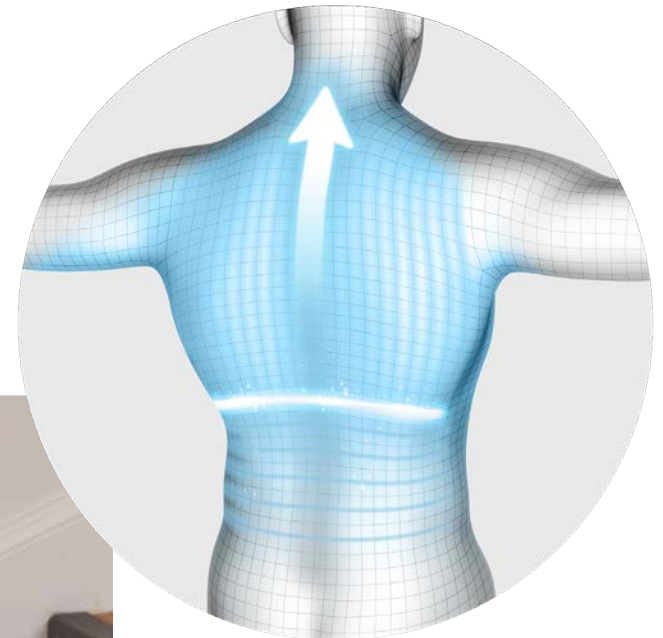

A tailor-made massage

The secret of Bodyscan Massager lies in its unique and innovative technology: a scan function integrated directly into the massage mechanism.

During each use, the massage seat takes the time to scan your back completely, from the bottom of the back to your neck, to determine strategic massage points. The mechanism will then adapt the massage according to the results obtained. The 4 silicone massage heads will deeply massage the smallest recesses of your back.

Since the massage is more targeted and personalised, it becomes more intense and effective.

Shiatsu and rolling massage, the 2 essential well-being

The benefits and advantages of **shiatsu and rolling** massages are no longer to be demonstrated:

The pressure exerted by the 4 rotating silicone heads perfectly mimics the professional movements of **shiatsu** massage. This type of massage has repairing properties for the body. Pressure and kneading will relax areas of muscle tension and provide a deep feeling of well-being.

Rolling massage is a massage that promotes stretching. It is ideal for loosening the skin, releasing muscle tension and increasing local circulation. The device will apply pressure on both sides of the spine to mimic this feeling of stretching. The muscles are revitalised and free of any tension.

Multiple features & benefits

In addition to its body scan function and the combination of its two types of massage, the Bodyscan Massager brings with it many qualities.

Ease of storage is a function specific to the Bodyscan Massager: thanks to its 2 storage straps above the massage seat, it is possible to strap it and store it directly in your cabinet.

2 straps

Fixation clip

Thanks to the fastener on the rear, your massage seat cover will be properly held in place on the back of the chair.

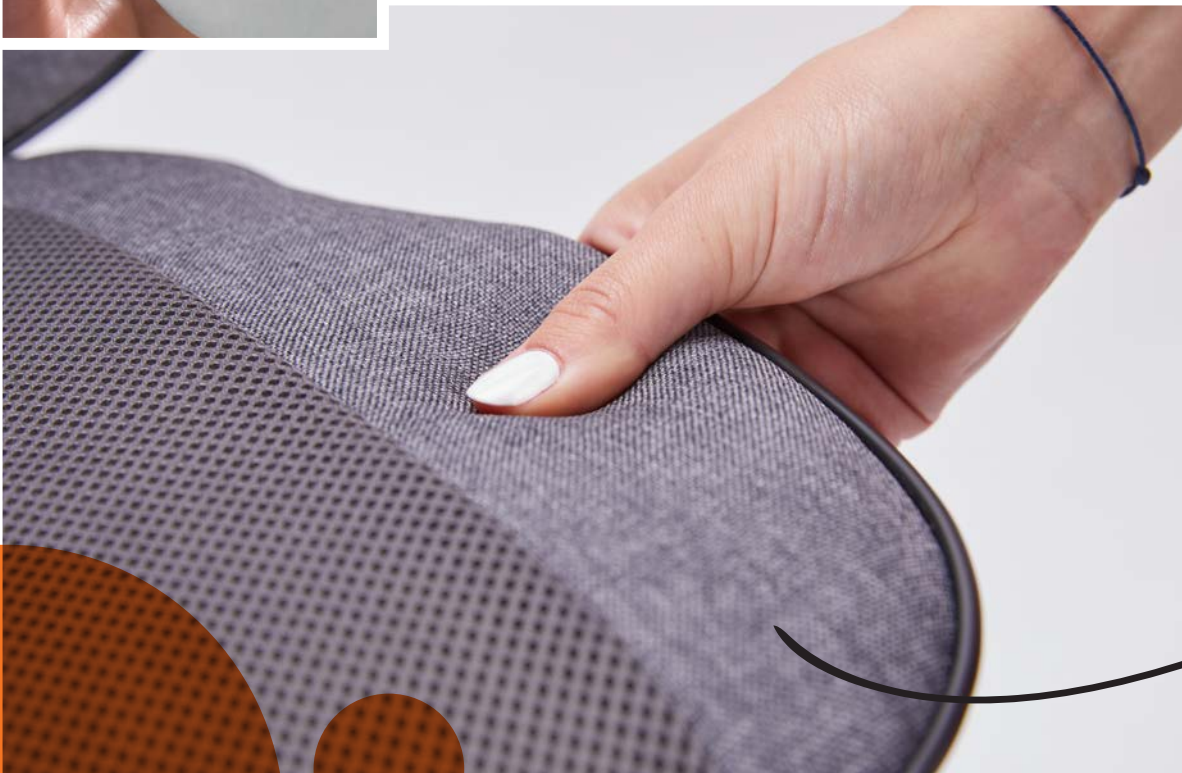

Silicone

For a gentler, natural massage, the mechanism is made up of 4 silicone massage heads, which will allow an effective and deep massage.

Timer

Its timer function allows you to choose your ideal massage time (10 or 15 minutes).

For optimum comfort, the seat is thick and soft. It will fit perfectly into your home, whether you wish to use it on your sofa, chair or office chair.

Thick, soft seat
