WATERPROOF

IPX7

The **WF-100** is designed to improve daily oral hygiene through its highly portable design and ability to provide highly targeted healthcare.

Ideal for those looking for a practical and effective solution for cleaning teeth and gums, this hydro flosser combines performance and ease of use.

4 operating modes for all-round dental care

The **WF-100** has four operating modes for all needs: Soft, Medium, High and Pulse. These options allow users to customise their dental care based on their specific needs and the sensitivity of their teeth and gums.

4 MODES

Soft: Ideal for new users and sensitive teeth

Medium: Suitable for daily use

High: For deep plaque removal

Pulse: Experience varying water jet intensities for a deep clean while gently massaging your gums

COMPLETE CARE

Gum massage

Cleaning of interdental spaces and of periodontal pockets

Removal of dental plaque

A WF-100 for the whole family

The **4 tips** mean it can be used by all members of the family.

Precision guaranteed

Its **360°** rotating tip provides access to all areas of the mouth. Simply slide the tip over the teeth to clean the space between each tooth or gum.

360°

Cordless technology and large tank

In addition to its large 300 ml reservoir, it has a battery life of up to 80 minutes, making it an ideal oral hygiene companion to take anywhere.
