RELIEVES MOSQUITO BITES

Acts on itching and swelling

SUITABLE FOR ALL

MEDICAL DEVICE

2 PROGRAMMES

RELIEVES PAIN BY USING HEAT

# Summer is mosquito season

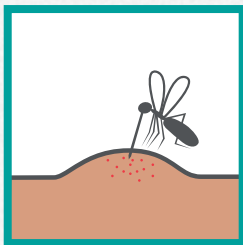

If you spend a lot of time outdoors, it is difficult to avoid insect bites, which can cause pain, swelling or severe itching.

**IBH-100** has been designed to provide instant relief after insect bites **without** the use of chemicals, thanks to heat production.

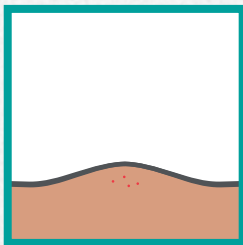

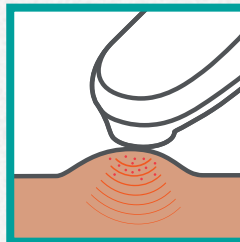

## Precise and instant effectiveness

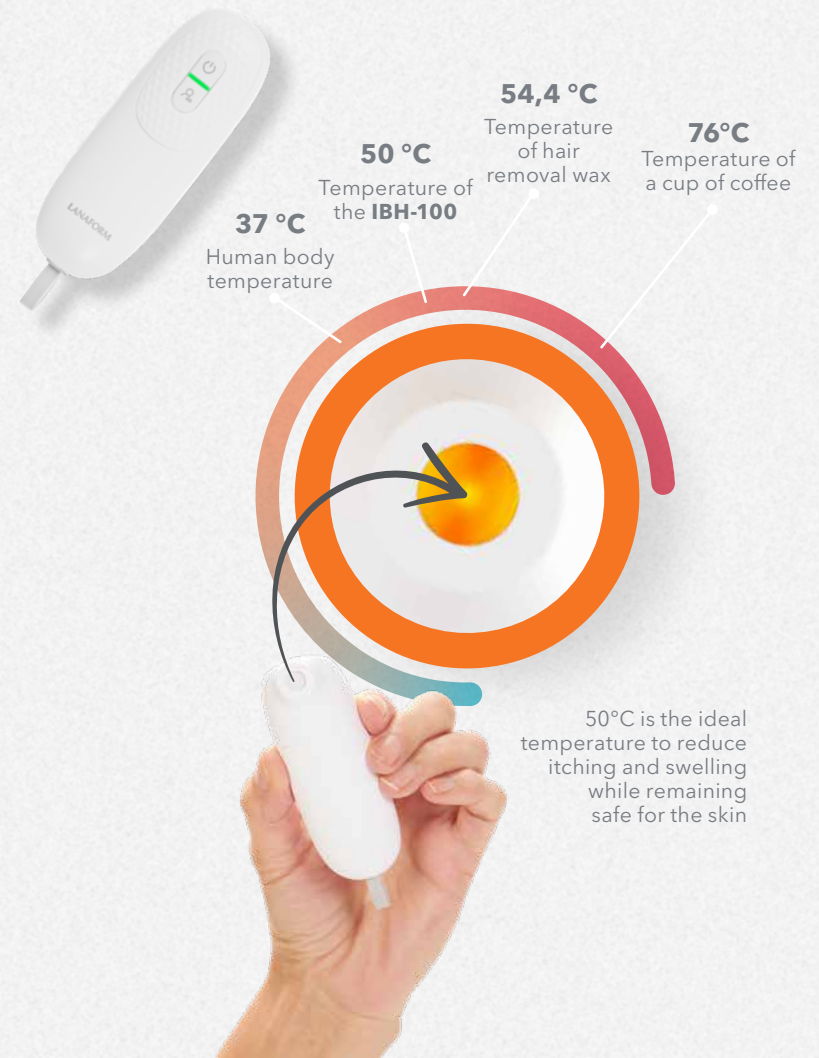

Itching caused by a mosquito bite is a reaction of the body to the saliva of the mosquito injected during the bite. Our immune system defends itself against saliva that is foreign to the body by secreting histamine. As a result, the vessels expand, the puncture swells and begins to itch.

The **IBH-100** works thanks to **natural heat production** in an ultra-targeted and localised manner in the area to be treated. The **ceramic** heater plate with rapid temperature increase allows the target area to be treated simply by touching the skin.

Within a few minutes, the itching fades and the swelling of the skin decreases..

## 2 programmes for all skin types

The **IBH-100** has 2 different usage times (3 sec. and 6 sec.) to adapt according to the **sensitivity** of the skin.

## Daily practice

Compact and lightweight, the IBH-100 can be taken anywhere, whether hiking, camping or travelling. Ideal for slipping into any handbag, it will be **always within easy reach** to relieve insect bites.

## Suitable for the whole family

Insect bites and stings are relieved by heat alone, **without any chemical substances**. Use of the **IBH-100** is therefore also suitable for pregnant women, children or people with allergies.

# IBH-100

## RELIEVES MOSQUITO BITES

REF: LA130603 • EAN CODE: 5410984119240

## Characteristics...

- Insect Bite Healer device
