# Ultrasound essential oil diffuser

The Davy Mist diffuser allows you to benefit from the **benefits of essential oils**, inviting you into a deep sense of well-being.

Its **ultrasound technology** creates a warm, relaxing atmosphere, scenting the room with the fragrance of your choice.

Davy Mist has **two levels of intensity**, allowing the diffusion of essential oils to be modulated.

Its **120ml** reservoir allows continuous diffusion until it runs out of power.

## Sleek design and noble materials

The Davy Mist essential oil diffuser stands out from other models in its design and materials.

Its base, composed of **beech wood**, is topped by a **glass bell**. The result is a diffuser with a lantern-like design, noble materials and **quality finishes**.

Davy Mist is more than just an essential oil diffuser: it is also a beautiful decorative object. It blends into any interior to add a touch of **elegance and modernity**.

## Light functionality

In addition to its design, the Davy Mist diffuser shares other points in common with a lantern.

This indispensable ally of well-being has a **light function** and can be used as a real bedside lamp.

It emits a **warm light** with a **wood fire** effect to reinforce its relaxing effects.

Its light functionality is fully adjustable, so you can choose the intensity.

It is also independent of the diffusion of essential oils, so the two can be activated separately according to your needs and desires.
