2in1 Mirror

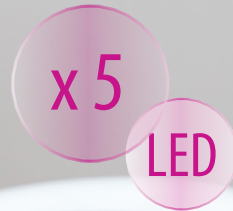

With **5x magnification on one side**, a **luminous halo of variable intensity** and a **swivel suction cup**, the **2-in-1 mirror** will have a prime position in your bathroom. You'll be able to choose to **fix it over your large mirror** with its **adhesive suction** and it will therefore complement a mirror with 1x magnification. Its swivel suction cup means you'll be able to find the perfect angle over your mirror for putting your makeup on.

You can also simply **place it on a table** or chest of drawers and put your makeup on or **wax with precision**. Since the **intensity of the LED lighting varies**, you can adjust the luminosity to your environment so that you'll always have the right vision.

Suction pad

Rechargeable

Adjustable angle
