

With a **rotating x1/x10 double side**, the Stand Mirror will be perfect on your chest of drawers. Its elegant design and its **18-LED luminous halo** will help you maintain a **total brightness** on your face. With its variable light intensity, the Stand Mirror will help you adjust your makeup to any situation: use warmer lighting for an evening outing while cooler lighting is recommended for a day at the office.

The **15-cm diameter of its reflective surface** will help you get ready by allowing you to see the whole of your face and neck. Furthermore, its **x1 side** will ensure your **makeup and facial care are appropriate** and its **x10 magnifying side** means that you will be able to **work with precision** when removing hair from facial areas or even applying makeup around your eyes and lips.
