- Changing LED colours
- ON/OFF mode or timer (20 mins)

- Ultrasound **humidifier**
- 3 emission intensities (120 -150 - 180 ml/h)
- Autonomy : 9 hrs

Moony

Moony is a magic star that transforms your baby's room into a **healthy, calm environment** at bedtime: it humidifies the air in the room and **diffuses essential oils** with its ultrasound technology, acts as a **reassuring nightlight** with its soft white light and **captivates** baby with its projection of the moon and coloured stars onto the ceiling. These functions can also be used separately as you need them.

Maintaining a relative humidity level in the bedroom of between 40 and 60% helps **reduce the proliferation of viruses and bacteria**. This will also **help relieve cold symptoms** and congestion, **as well as discomfort** associated with a dry nose, eyes, throat and skin.

Nightlight ON/OFF

Safe, easy filling through the top
