

Body Tapping HANDHELD MASSAGER

Body Tapping LA110222

1,25 kg

Master Box

4 pcs

34,4 x 24,8 x 43,2 cm

Massage using tapping originates from Sweden and consists of rhythmic vertical beats on the skin with both hands. This technique is effective in stimulating the muscles, but also in releasing body tension. Body Tapping accurately imitates this movement to provide you with a genuine feeling of wellbeing.

6 massage areas - 3 heads

With its two levels of intensity and 3 interchangeable heads on the Body Tapping device, you'll always be able to adjust your massage to produce the effect you want and in the area targeted:

- A round head for a gentler massage on the neck and cervical vertebrae
- A head with nodes for an intensive massage of the back and thighs
- A pointed head for an accurate massage of specific acupuncture points on the back and calves

Head with nodes

Pointed head
