

♥ TENS FUNCTION

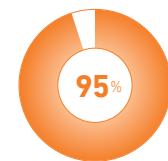

With its TENS function, the Medi Stim interrupts the transmission of pain in the nerves, providing immediate, effective relief of painful symptoms in the muscle and joints due to stresses and strains.

PAIN RELIEF

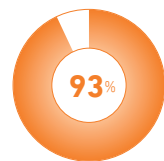

According to one clinical study⁴, 95% of Medi Stim users notice relief of their back pain, one of the most frequent pains, while 93% of users also notice a pain-relieving effect on their neck.

MORE COMFORTABLE ON A DAILY BASIS

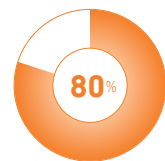

Daily use of the Medi Stim not only relieves discomfort in daily activities and when sleeping, but also in sports activities among 8 out of 10 individuals.

95% of Medi Stim users notice that it provides relief of their back pain⁴

93% of Medi Stim users notice a pain-relieving effect on their neck⁴

80% of Medi Stim users notice that it provides relief of discomfort in their sports activities⁴

⁴Survey carried out among 22 people over the age of 18 who have used the product for 28 days for 20 to 30 minutes a day.

WHAT IS ELECTRO-STIMULATION ?

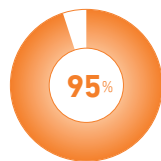

Electro-stimulation limits bodily impulses transmitted by the skin to the nerve and muscle fibres, using electrodes which, positioned in various places on the body, send harmless and painless electrical stimuli. The effects of electro-stimulation complement regular work on the muscles and can quickly be seen.

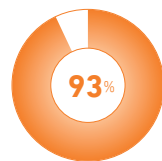

Fitted with **2 independent stimulation channels** and 4 electrodes, the Medi Stim electro-stimulator is the partner of choice for improving physical well-being, **toning and relaxing** the muscles as well as **relieving aches and painful symptoms** of the joints. With its **TENS** and **EMS** functions that can be carried out across **10 pre-recorded programmes** and its intensity that can be adjusted as required, the Medi Stim has proved very comprehensive and yet easy to use.

97% of Medi Stim users value it and would recommend it to their friends¹

95% Medi Stim users note that it generally helps improve their well-being¹

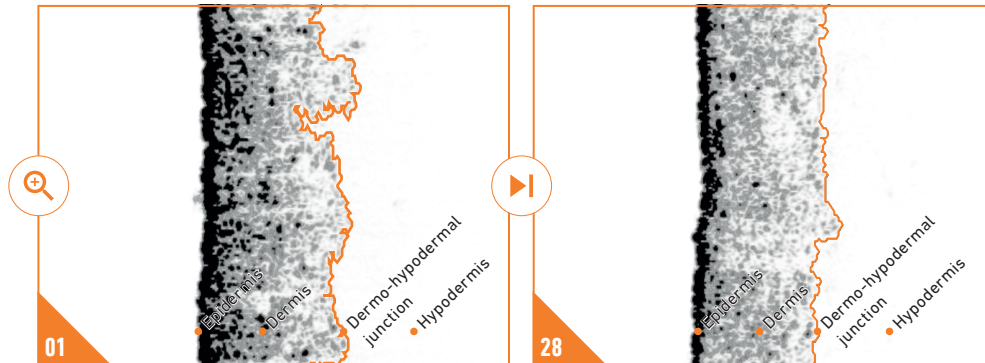

93% of Medi Stim users find it easy to use¹

¹ Survey carried out among 44 people over the age of 18 who have used the product for 28 days for 20 to 30 minutes a day.

EMS FUNCTION

The EMS, or electrical stimulation of the muscles, is a method that is recognised in the sporting and cosmetic fields. In cosmetics, the Medi Stim is distinctive due to its anti-cellulite action, noticed by 3 out of 4 people².

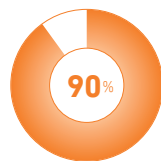

Reduces the linear length of the dermo-hypodermal junction (tissue site separating the dermis and hypodermis containing the body fat reserve) on the thighs over 28 days, reflecting a reduction in fatty tissue. (DermaLab HD Skin Ultrasound Imaging)

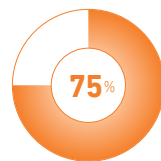

OPTIMISATION OF TRAINING

Medi Stim is the perfect complement to sports training. In fact, 9 out of 10 users notice²:

- ✓ general toning of their body
- ✓ less muscle fatigue
- ✓ sense of relaxation

90% of Medi Stim users see their skin becoming smoother and firmer and their figure slimmer²

75% of users notice the Medi Stim's anti-cellulite action²

² Survey carried out among 22 women over the age of 18 who have used the product for 28 days for 20 to 30 minutes a day.

IMPROVES YOUR SHAPE

9 out of 10 users see their skin becoming smoother and firmer and their figure slimmer²:

- ✓ Size: -4.3cm³
- ✓ Hips: -6.1cm³
- ✓ Thighs: -3.4cm³

³ Maximum centimetric loss noticed during clinical tests among 22 women over the age of 18 who have used the product for 28 days for 20 to 30 minutes a day.
